MFX SYSTEMS

MFX Systems is our IT and technology division. MFX Systems is a professional, leading-edge IT company that provides:-

- Support solutions including a helpdesk and support team.

- IP telephone systems.

- New network installs and upgrades.

- Managed hosting and Co-location.

- Structured cabling.

MFX Systems provides IT services to the SME market or any organisation that relies on fully functional systems but doesn't have the time or budget for in house IT resource. Working with industry leading manufacturers and strategic partners, we offer a comprehensive range of products and services including IT Support, Virtualization, Telephone Systems and managed hosting services.

IT Auditing and Asset Management

Our highly trained auditors visit your business premises, be it a data centre, computer room or office and gather a range of statistical information from your intelligent network devices. This allows them to analyse your network and compile a comprehensive audit report.

The audit services can be broken down into individual components or combined to give an overall picture. The 3 main elements of an IT audit are: -

1. Software Audit
2. Network and Hardware Audit
3. Infrastructure Audit

The benefits of Software Auditing

- Ensure you always receive the support and upgrades you are entitled to from suppliers

For initial discussions call 01322 424573

Or email sales@microfix.co.uk

www.microfix.co.uk/technology

- Reduce the risk of viruses entering your systems

- Increase business continuity

- Know exactly what software is being used and by whom

- Easily identify if users have software they don't need

- Improve planning by knowing when software becomes obsolete

- Increase your purchasing clout with your key software partners

- Ease the process of merger and acquisition by ensuring there is no software duplication

The benefits of network auditing

- Locating all components to ensure no duplication of purchases

- Planning for future IT requirements becoming easier

- More time to spend on new or important but less urgent projects

- frees up network ports that are no longer in use

- knowing what network kit is in use...and re-use equipment that is not being fully utilised

- reduces downtime through accidental hardware removal

  Flexibility to re-engineer traffic patterns based on traffic volumes

  The benefits of an Infrastructure Audit

- A complete overview of the existing Network infrastructure

- Full knowledge of where IT cable runs are knowledge of capacity (i.e. number of users)

- this is a network audit function

- Optimum utilization of the existing IT investment
